Pravin Kumar Durairaj

+353-899894597 | pravinkumardurairaj@gmail.com | Dublin, IRELAND | @PravinDurairaj

CAREER SUMMARY

Data analytics professional with 7+ years of experience helping business and technical stakeholders navigate complex data challenges. Proven ability to deliver clear, actionable insightful dashboards, and creative problem-solving. Passionate about data technology and learning, with a strong track record of building advisory relationships through proactive, above-and-beyond support. Experienced communicating technical findings in plain language, authoring knowledge-base documentation, and surfacing product improvements based on real usage patterns to help data teams be more successful every day.

CORE ANALYTICAL SKILLS

Data Analysis & BI: SQL, data modelling, KPI dashboards, data visualization, data storytelling, variance & trend analysis, ad-hoc analysis
BI & Reporting Tools: Splunk (Dashboards, Calculated Fields, KPIs), Power BI concepts, stakeholder reporting, requirements gathering
Customer & Technical Support: Slack-based support, bug reproduction & high-quality reporting, root cause analysis, technical documentation, self-service knowledge base authoring, cross-functional collaboration
Programming & Automation: Python, Bash, Shell Scripting, Git, CI/CD, Linux, Jira, ServiceNow
Data Management: ETL/ELT Pipelines, Data Quality Checks, Large-Scale Datasets
Business & Stakeholders: Executive Reporting, Financial & Operational Metrics, Cross-Functional Collaboration, Feature Request Advocacy

PROFESSIONAL EXPERIENCE

Senior Big Data Analyst | Murex Advanced Technologies | Dublin, IRELAND Nov 2021 – present

- Served as the frontline technical resource for stakeholders — investigating complex data problems across high-volume transaction and operational datasets, and communicating clear, actionable insights via written and verbal channels.
- Designed and maintained **interactive KPI dashboards** (Splunk, Power BI-style analytics), enabling data teams and business partners to self-serve insights into application performance, transaction trends, and operational risk.
- Performed root cause and impact analysis during production incidents — translating technical findings into plain-language remediation recommendations, enabling faster decision-making by non-technical stakeholders.
- Surfaced recurring user pain points and filed structured bug reports and feature requests to Product and Engineering, directly influencing prioritisation and improving service stability.
- Automated analytics, data extraction, and validation workflows using Python, reducing manual reporting effort by 40% and improving reliability of production data pipelines.
- Authored documentation, data definitions, and troubleshooting guides to standardise reporting and enable self-service, reducing repeat queries and improving team-wide understanding.
- Shared deep knowledge of actual data usage patterns cross-functionally with Product and Engineering to inform how features were developed and prioritised.
- Conducted SQL-based variance and trend analysis across large datasets, identifying anomalies and providing proactive recommendations to technical and business stakeholders.

Tech Stack: Python, Splunk Enterprise & Cloud, SQL, Shell Scripting, Linux, Excel, ServiceNow, AWS, Jenkins, Git, Jira, Bitbucket.

Programmer Analyst | Cognizant Technology Solutions | Chennai, INDIA Apr 2017 – Sep 2020

- Provided analytics support during production releases and incidents — diagnosing issues from data, communicating clearly with stakeholders, and ensuring SLA adherence.
- Resolved **50+ high-impact issues** affecting system users and operational workflows through data investigation and trend analysis, delivering targeted recommendations.
- Identified **100+ configuration and performance issues** through proactive data analysis, enabling remediation before they impacted end users — demonstrating the value of digging deeper beyond the surface question.
- Applied strong **SQL skills** to extract, transform, and analyse structured and semi-structured datasets, collaborating with business stakeholders to translate reporting needs into dashboards and recurring reports.

- Developed **ETL-style automation scripts** to improve data quality, validation, and analysis — reducing manual workflows and enabling consistent reporting.
- Designed proof-of-concept solutions and shared findings cross-functionally to recommend tooling improvements that improved customer experience and operational stability.

Tech Stack: Python, Shell Scripting, Linux, Docker, Azure, PostgreSQL, GitLab, Jenkins, ServiceNow.

EDUCATION

MASTER'S DEGREE | Data Analytics | National University of Ireland, Galway 2020 – 2021

BACHELOR'S DEGREE | Electrical & Electronics Engineering | Sairam Institute of Technology, Chennai 2012 – 2016

CERTIFICATION

Splunk Core Certified Power User (2024)

Troubleshooting Splunk Enterprise (2024)

Splunk Core Certified User (2023)

Microsoft Certified: Azure AI Fundamentals (2021)

VISA

Stamp 4 – Eligible to work in Republic of Ireland without requiring employment permit.
